Questions & Answers on the usage of
Weed Impede® 2 in 1 Concentrate & RTU

What is Weed Impede 2 in 1? This is a combination of glyphosate (Roundup®) and Prodiamine. Glyphosate is a post emergence herbicide that controls existing weeds whole prodiamine is a pre emergence herbicide that controls weeds prior to their coming up. Therefore, you get the effects of both herbicides in one package.

Where do I use Weed Impede 2 in 1? In non planted areas (driveways, walkways, patio, fence lines, retaining walls, vacant areas, etc) Around the base and under well established (6 months old or more) trees and shrub, used to edge lawns, on gravel areas.

What is the Principle behind Weed Impede 2 in 1? One ingredient enters the plant through the foliage and moves down into the roots killing it. The other ingredient provides an invisible barrier in the soil preventing growth and development of newly germinated weeds.

What rate do I use with Weed Impede 2 in 1? Apply 3-6 oz. per gallon of water per 1,000 sq. feet. Use the higher rate for longer control.

What do I apply Weed Impede 2 in 1? It can be applied anytime of the year. For best results the emerged weeds should be actively growing and daytime temperatures above 60°F. More than one application per year can be made.

When can I replant after application? Bedding plants, trees, shrubs, sod and seed can be planted four months after application.

What precaution should I observe? Avoid drift. Do not apply to the foliage of desirable plants. People and pets should not enter the treated area until the spray has dried. Do not apply to newly planted trees or shrubs (they should be at least 6 months old)

What weeds are controlled? Most all annual weeds and grasses post emergence. Many common weeds and grasses pre-emergence.

What sizes are available? The concentrate is sold in pint, quart and gallons, the RTS is a quart container.
